Thinkerbell Labs

Making Learning Inclusive

5 Min Read

In case you missed the previous newsletter, read it here.

This festive season, we're celebrating the light that comes from learning, growing, and inspiring others.

Building Confidence Through Braille, Dreaming Big.

"I want to help others like me learn and grow!" -Susanta

Meet **Susanta Munda**, a student at the School for Deaf and Blind in Telkoi, who has a dream of helping children like himself learn braille and become more independent.

Since starting his journey with Annie, Susanta has grown more confident in recognising braille alphabets, understanding dot combinations and reading braille books. He especially enjoys Annie's end of lesson games, with Odd One Out being a favourite!

And what does he want to do when he grows up? Become a **social worker or teacher** who helps others like him learn and grow.

And while stories like Susanta's remind us why this work matters, we're constantly working to take the same opportunities to more learners across the country.

This Month at a Glance

We had the opportunity to showcase Thinkerbell Labs' work to key government leaders.

Our Co founders and Prathamesh with Shri Ravinder Singh, Cabinet Minister, at the Government of Delhi

We met **Shri Ravinder Singh, Cabinet Minister**, at the Government of Delhi, where Prathamesh joined us for a demonstration of Annie and Tactera. The meeting led to fruitful conversations around our work in accessible learning and the potential of assistive technology.

We also presented Annie and Tactera to **Shri Tokhan Sahu, Minister of State for Housing and Urban Affairs, Government of India**, sharing how our products are working towards making education and digital access more inclusive.

Every such conversation helps take the possibilities of accessible technology to more decision-makers and brings us closer to creating a wider impact.

Bring Annie to a Learner →

And speaking of taking our work to a wider audience, we have some especially exciting news to share!

Lights of Change: Annie Takes the Spotlight with HP!

This festive season, Thinkerbell Labs was among the many inspiring innovations featured in **HP India's Lights of Change campaign**, celebrating changemakers using technology to create a meaningful difference in people's lives. With the campaign reaching **77.5M views** across films, it's been an exciting opportunity to take Annie's story to a much wider audience and put accessible learning in the spotlight.

🌟**A big thank you to HP for recognising our work and helping us share the possibilities of technology-led inclusion with the world!**🌟

Watch Annie's story

And the spotlight didn't stop there! From London to Bengaluru, Annie and Tactera have been on the move, making their way to conferences and sparking conversations about the future of accessible technology.

Thinkerbell Labs Around the World

Sight Village London 2026

At Sight Village London, Tactera generated strong interest from assistive technology organisations and potential distribution partners.

We had encouraging conversations with prominent distributers, who expressed interest in Tactera and its potential in the refreshable braille display market. We also connected with **HumanWare and the Braillists Foundation**, gathering valuable feedback through product demonstrations and hands-on interactions.

One Purpose India Forum 2026

We were delighted to attend the One Purpose India Forum 2026 by CSRbox in Delhi as Runner-Up Awardees in **Geriatric Care & Assistive Technology category**.

19th India CSR Leadership Summit

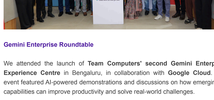

We were in Delhi for the 19th India CSR Leadership Summit, connecting with key voices from the CSR ecosystem.

We met several CSR leaders and organisations, shared Thinkerbell Labs' work in accessible education, and explored potential avenues for collaboration. The conversations opened up opportunities to take our impact to more learners.

CSRBOX® Doing Good in a Better Way

From an insightful masterclass on impact measurement by **Sharanya Chandran of J-PAL**, to **hearing Bhomik Shah of CSRBOX** share his vision for the ecosystem, the forum offered plenty of food for thought.

Gemini Enterprise Roundtable

We attended the launch of **Team Computers' second Gemini Enterprise Experience Centre** in Bengaluru, in collaboration with **Google Cloud**. The event featured AI-powered demonstrations and discussions on how emerging AI capabilities can improve productivity and solve real-world challenges.

Bangalore Skill Summit (BSS)

We showcased Annie and Tactera at the Bangalore Skill Summit alongside other assistive technology startups. Both products received positive feedback and interest from visitors, offering an opportunity to engage with the wider assistive technology community.

From the field

"There's nothing quite like seeing a child go from struggling with their first Braille lesson to confidently reading their first letters with Annie. Witnessing these little milestones and hearing students talk about what they've learnt is what makes my work so rewarding."

-Vidyashree S

Learning Experience Team, Thinkerbell Labs

We asked the team to draw who do they think Annie would be as a sidekick or a fantasy creature? Here's what came back. Doodles by: Sheetal, Nitika, Swagnali & Avinash!

Until next month,
Dilip Ramesh
Co-Founder & CEO
